Total Solar Eclipse over Missouri

August 21-2017

Time: 1:09 pm-1:15pm (Kansas City-Columbia area)

For the first time since 1979, a total eclipse of the sun will be happening across the Midwest and will be cutting across Missouri diagonally from St. Joseph to St. Genevieve.

During a total solar eclipse, the moon will block the sun's bright face briefly revealing our star's outer atmosphere. On August 21st, the moon's 70 mile wide shadow will cross the United States from Oregon to South Carolina turning day to night. In the Lafayette County area we can expect to see this happen around 1:09-1:12p.m. and will last roughly 2 ½ minutes.
